

9 Benefits of Online Tuition

Streamline tuition management for schools. Simplify tuition payments for families.

Paying and processing tuition should be as painless as possible—for families and your business office. Now more than ever, schools and families rely on safe and secure ways to make timely tuition payments with minimal contact. An efficient online tuition payment solution allows your school to maintain a positive cash flow while providing your families with the flexible and convenient payment option they want.

1. Meet rising family expectations

Consumers rarely write checks today. They expect convenience, flexibility, and ease for handling routine transactions online or with the swipe of a finger. The right online portal allows quick credit card, ACH, or e-check payments—even automatic recurring payments and auto-pay notifications. Want to provide the best experience possible for your families? Online tuition is the way to go.

2. Maximize on-time payments

The struggle is real. It's an ongoing challenge for your business office to collect on-time tuition payments, especially at schools where parents still pay by paper check. Flexible online payment plans with a "set it and forget it" auto-pay option can help a school accommodate parents' needs and schedules. Make it easier and more convenient for families to pay and cash and increase your on-time payment rate!

3. Intuitive admin experience

Imagine everything you need in one place. Update payment plans, review plan participants and parent accounts, create notifications, run reports, and easily export data—all within a format designed to meet your business office needs, no matter how tech-savvy you are.

4. Save time

Reclaim your workday. Eliminate manual data entry and bank runs to deposit paper checks. Using the online portal, your daily workflow of tracking, managing, and reconciling payments is streamlined and simplified. You also drastically cut down on fielding family calls about remaining balances since they have online access to view their account details. It's a win-win!

7. Go green

The future is paperless. Lower your school's carbon footprint and save yourself the hassle of dealing with printed receipts, family notices, and physical record files. Online tuition is an environmentally friendly option that avoids unsecured, lost in transit, time-consuming; and expensive paper means.

5. Save money

Let's face it, most schools run on tight budgets. Competitive, fixed processing rates are key to managing payments effectively. And with custom cost-management options to suit your school's needs, you can also extend the savings to your families.

8. The choice is yours

You can have it all. Every school has unique needs and it's important that you have the flexibility to set up a fee structure that will work for you. The right online tuition management solution will allow you to set up your fee structure the way you want. Create a cost-neutral option that off-sets fees for both your school and your families. Offer discounts for cash payments. Or offer to have the school pay processing fees. It's up to you.

6. Get funds faster

Why wait? You can depend on daily deposits instead of waiting the customary 7 days to receive your funds. Automated deposit processes complete without additional oversight from the business office. Get into reconciliation sooner and spend your time on customized reporting, data analysis, and budget review.

9. Security and reliability

Data security is top priority, and you can feel confident knowing you're covered. All Diamond Mind software and payment processors are Payment Card Industry Data Security Standard (PCI) compliant – a must for any school accepting credit or debit cards for payments.

About TuitionPay, a Diamond Mind payment solution by Community Brands

TuitionPay is user-friendly online tuition payment portal for K-12 independent schools specifically designed to meet a school's unique needs. At Diamond Mind, we are experts in the K-12 payment industry, and we understand the specific needs of different types of schools of all sizes. We work directly with schools to evaluate which tools will work best to meet their unique needs and budget. We offer our own payment software and we also integrate with various partner products.
