

Creating QR Codes in CampusPay

1. Under options, select the three-dot icon for the form you would like to generate a QR code for and select “Show QR Code”.

2. Your QR code will be generated in a few seconds, after which you'll be able to copy or download it.

Print the QR code around your school for ease of payment acceptance! Once you scan the QR code, the form will open, and your users can easily complete the form on their mobile device.
